

The Automop scrubber is designed for cleaning flat surfaces with its two brush floor system. The dirty water is sucked into the waste tank by the suction squeegee behind the machine.

The product is slim in appearance, light in weight, easy to carry, and can clean narrow and low areas that the general floor washer cannot reach.

Simple Operation Panel

The utility model has the advantages of simple and flexible operation, small 360 degree turning radius.

Double Brush Design

Brush plate with high quality brush wire, wear resistance, long service life. Ergonomic The Angle of the handle can be adjusted according to the height of the operator.

Large capacity Lithium Battery

Equipped with a large capacity lithium battery, detachable separation design, spare battery, can be replaced at any time to extend the working time.

Magnetic Suction Brush

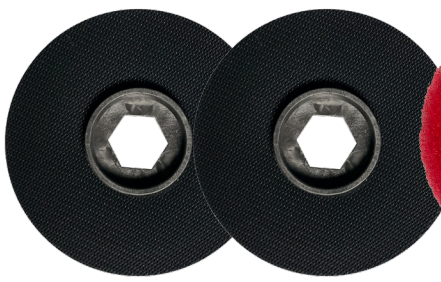

The brush is fixed magnetically making removal and attachment for cleaning maintenance very easy. Kit also comes with pad holder set.
